Nampa ID 83651
208-466-4762

Thank you for purchasing the best looking rack in the motorcycle industry. Your new rack is constructed of 6061 billet aluminum and then anodized to give you a high quality and good-looking rack for years of backpack free riding enjoyment.

Instructions: Yamaha 93-07 XT225 (PMB-01-5202)

NOTE: We recommend using a removable thread-locking compound on all bolts.

1. Remove stock grab handles (turn signals if applicable).
2. Install side brackets to the bike, then the grab handles, then turn signals (if applicable) using four 8x30mm hex head bolts. Leave them loose.
3. Install the rack top to the side brackets using four 6x16mm flat head bolts. Tighten the four rack top bolts to the side brackets.
4. Tighten the four side bracket/grab handle bolts.
5. Trim any bolts, if necessary, to provide clearance for the tire.

CAUTION: As with all racks on dirt bikes, they should not have excess amounts of weight put on them. Excess weight can damage the rear subframe of the motorcycle.

Parts List:

1-Top

2-Sides

4-8x30 HH

4-6x16 FH
