

11461 Lone Star Rd Nampa ID 83651 sales@promotobillet.com 208-466-4762

Instructions: 04-13 KTM ALL 125-530 (PMB-01-9020B)

1. Remove the rear axle nut and the axle.
2. Remove rear wheel.
3. Slide the disc guard up into position between the swing arm and the brake caliper mount.
4. Insert the two bosses on the disc guard into the slot on the caliper bracket. (Figure 1)
5. Attach the bracket to the inside of the disc guard using the 4 supplied bolts. (Figure 2)
6. Re-install the rear wheel. Install the rear axle and nut (Now would be a good time to adjust your chain if necessary).
7. Tighten the rear axle nut.
8. Re-check all bolts for tightness and go ride!
