

Instructions – PMB-01-2002

Thank you for your purchase! We are confident that you will be pleased with the quality of our product.

Parts List:

1-Kickstand 1-8x30 FH 1-8x80 SH 1-M8 Washer 1-8x10x5 Spacer

NOTE: We recommend using a thread-locking agent on all bolt threads.

To install your new kickstand:

- 1. Remove the lower chain roller and bolt; make sure you keep track of the order of the small parts for reassembly. Remove the sub-frame to main-frame bolt.
- 2. Install the 8x10x5 sub-frame spacer into the sub-frame bolt hole.
- 3. Install kickstand on the bike using the 8x30mm flat head bolt. Re-Install the chain roller using the 8x80mm socket head bolt, if the bolt is too long cut it off with a hacksaw or die grinder. We recommend using a removable thread locking agent on the bolts.
- 4. Make sure that you tighten all bolts to the correct torque.
- 5. Periodically check the kickstand pivot bolt for tightness.

To prevent damage:

- Clean and lubricate the kickstand pivot area after each ride! We recommend using a penetrating lube, such as WD-40. If necessary, you can remove the back cover plate for additional cleaning.
- Carefully position kickstand up and down.
- Do not start/sit on bike with the kickstand down.
